# ABOUT OUR COMPANY

Our company was established in 2018 with the goal of developing a reputable supplier of goods and services for the rubber industry. Our factory is situated in Thailand's Chachoengsao Province. To begin with, we merely consider trade in order to assess the demands and difficulties. On January 1, 2021, we opened a production facility to create dipped rubber bands of the highest quality. We began operating our recycling facility on January 1, 2022, to create premium devulcanized rubber from both natural and synthetic rubber. Upon request from clients, we also engage in trade and consulting regarding machines, chemicals, and items related to rubber.

Our business has been designated as a "Green Industry," and we have our own registered trademark, "Rubber Man." The rubber bands are made from high-quality, pure natural rubber and are environmentally friendly. Every stage of the production process, from the choice of raw materials and the blending of rubber compounds to the completion of the finished product, includes quality testing for our goods. We have a top-notch team of experts who use the most up-to-date technology to ensure the greatest use of the resources at our disposal and the creation of best items.

# Product Portfolio

## Focused Areas

Our Company focuses on Manufacturing, Trading and Consulting & Service Areas

### Manufacturing

- Premium Quality Dipped Rubber Bands
- Premium Quality Devulcanized Natural Rubber
- Premium Quality Devulcanized Nitrile Rubber
- Pre-vulcanized Latex

### Trading

- Extruded Rubber Band
- Latex Toy Balloons
- Rubber Slippers
- Machineries for Latex and Dry Rubber Products

### Consulting & Services

- Manufacturing of Rubber Dipped Products
- Sourcing of Rubber Chemicals

# Manufacturing

## 01 Premium Quality Dipped Rubber Bands

**Nylon Grade**

**Natural Colour**

**Exercise Band**

**Craft Band**

**Lobster Band**

**Ceramic Band**

**Floral Band**

**Pallet Band**

**Food Grade Band**

- **700% Elongation**
- **Bio-degradable**
- **100% Resilience**
- **Food grade rubber bands**
- **Fluorescent and Natural Colours**
- **3+ Years shelf life**
- **100% Natural**

---

# Manufacturing

## 02 Premium Quality Devulcanized Natural Rubber

Devulcanized natural rubber is recycled from natural rubber latex-dipped scrap with well equipped and modernized machinery. We are getting this scrap from most of the factories that are making latex products in Thailand. Today, the use of natural recycled rubber is widespread, ranging from household to industrial products. The DNR is currently available in off-white and black.

---

### Advantages of Devulcanized NR over Reclaim Rubber

- Keep the polymer chain intact.
- Superior end product physical properties
- Serve as a substitute for virgin rubber.
- Devulcanization of rubber requires less energy.

# Manufacturing

## 03 Premium Quality Devulcanized Nitrile Rubber

Devulcanized Nitrile rubber is recycled, particularly from Nitrile glove scrap, using modernized machinery. We get this scrap from the majority of the factories in Thailand that manufacture Nitrile gloves. Today, recycled Nitrile rubber is widely used in a variety of products ranging from household to industrial. The DNBR is presently offered in black and blue.

### Advantages of Devulcanized NR over Reclaim Rubber

- Keep the polymer chain intact.
- Superior end product physical properties
- Serve as a substitute for virgin rubber
- Devulcanization of rubber requires less energy

# Manufacturing

## 04 Prevulcanized Latex

Prevulcanized Latex (PV LATEX) is a specially compounded, ready-to-use latex compound. In general, there are three types of modulus compounds: low, medium, and high modulus compounds. Food-contact compounds that are nitrosamine-safe, accelerator-free, and ammonia-free are examples of special-type compounds. In addition to this, we can formulate the compound as per the customer's requirements.

Based on the needs of the customer, our highly skilled technical staff can create various prevulcanized latex specifications.

# Trading

**01 Extruded Rubber Band**

**02 Latex Toy Balloons**

**03 Rubber Slippers**

**04 Machineries for Latex and Dry Rubber Products**

---

# CONSULTING & SERVICES

## 01 Manufacturing of Rubber Dipped Products

- **Gloves**
- **Balloons**
- **Condoms**
- **Rubber bands**
- **Other dipped products**

## 02 Sourcing of Rubber Raw materials

- **Natural rubber latex**
- **Synthetic latex**
- **Natural and synthetic dry rubber**
- **Process chemicals**

"Any kind of customisation is possible with us"
