

INNOVATIVE SOLUTIONS FOR THE PROCESS INDUSTRY SINCE LAST THREE DECADES

Engineering Today : Greener Tomorrow

The Company

Diva Envirtec Pvt. Ltd. is a Process Engineering company, specializing in Filtration & Separation Technology. With a collective experience of over 20 years, the company has been value adding to Chemical Processes in various industries and remains committed to Environment Protection & Green Technology. Our core competencies evolve from a strong proclivity to innovation, a dedication to collaboration and unwavering faith in research.

We aspire to become the world's most admired Industrial filtration and separation solution provider, with a large, in-depth and innovative knowledge base.

In our quest to be the best in the global business of filtration and separation, our mission is simple, yet daringly inspiring: To be known as the most proactive 'solutions-service-support' brand with total customer centricity.

Our goal is to be acclaimed as the most dynamic company, with a unique and best-in-class work culture; to be a thought leader with a corporate responsibility for creating value and making a difference.

“committed to environment protection and green technology”

Key performance Drivers

Design - Customized solutions for each requirement

Industrial Expertise - Specialists for each segment addressed

Collaboration - Collaborate with international experts and draw from their rich experience

Assemble - The various components of the Unit, getting all Collaborators together

Execute - Employing Mechanical and Chemical Engineers, while overseeing the quality and delivery parameters

Measure - Criteria for delivering the required performance, in pilots before assembly

Erect - On site, with a special team of Erection Engineers

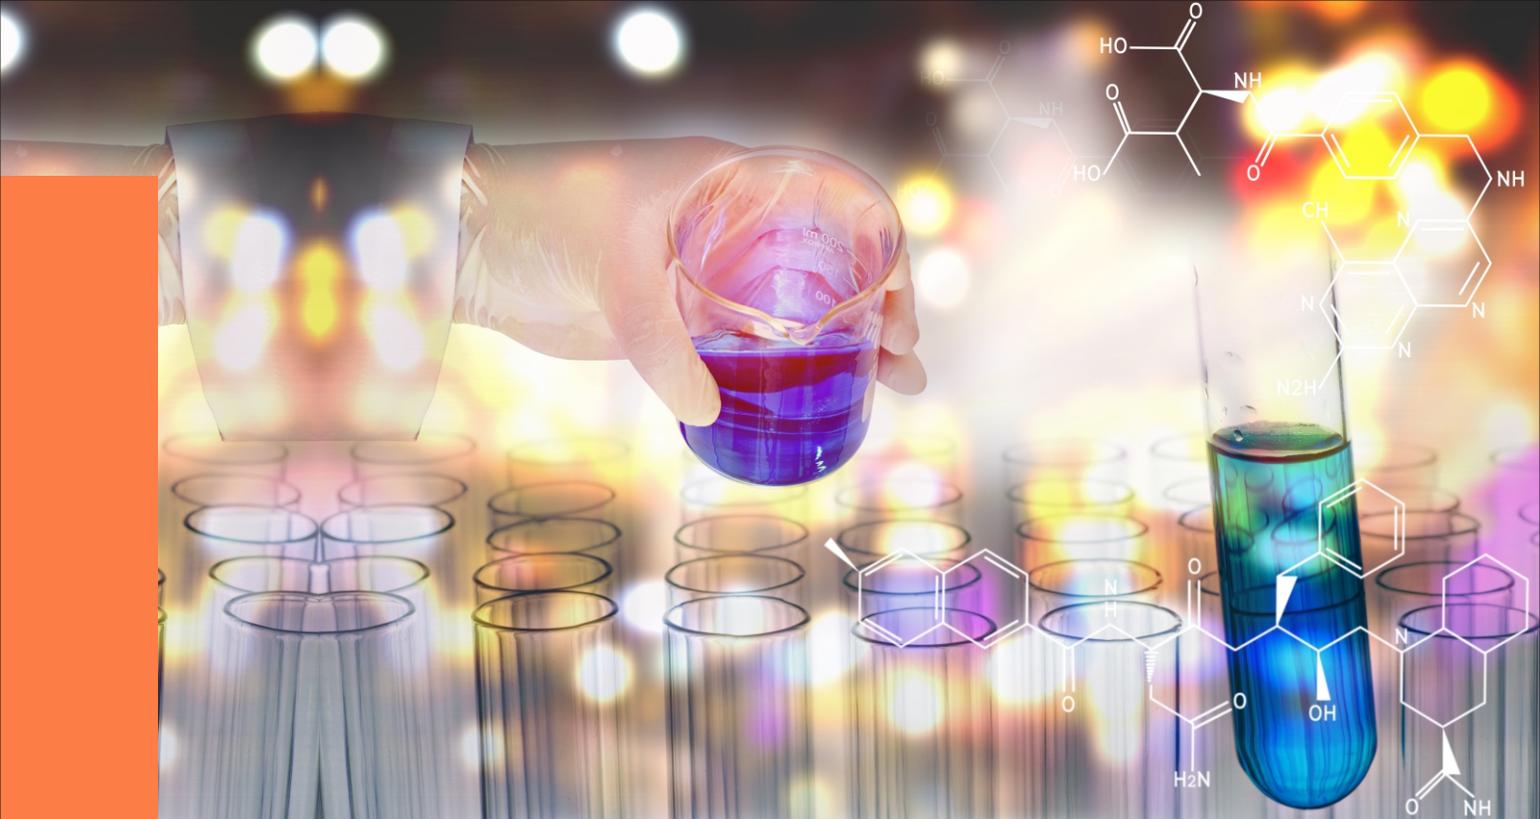

Test - On site, for performance parameters

Commission - The plant, and integrate with the existing process

Maintenance - Support and maintain the system to the satisfaction of customers

“customized solutions for each requirement and to the satisfaction of every customer”

Company Dynamics

At Diva Envitec Pvt. Ltd., our main areas of operation are water, air and climatic pollution control through filtration, while providing our clients with practical solutions that would increase productivity while ensuring zero error operations.

Innovation, experience and alternative technology, remain our business bent at Diva Envitec Pvt. Ltd. For over a decade, we have been providing uniform satisfaction to our client base comprising of a number of internationally reputed companies spread across a very broad and diverse range of industries including Pharmaceuticals, API, Biotech, Chemical, Food & Beverages, Dairy, Brewery, Winery, Energy, etc.

Future landscape

Acclaimed multinationals all over the world are seeking to minimize the damages on the environment as a direct result of exhaustive industrialization. The filtration industries all over the world are on an upward surge as an outcome.

Diva Envitec Pvt. Ltd. has not only managed to secure a strong foothold in the global and local filtration and separation market, but most importantly has created its own aura of dependability. Already an entire line of products like the Catalyst recovery filters, Solvent recovery solutions, Organophilic membranes, MBR-Membrane-Bioreactors, Automatic Self Cleaning Filters, Bag Filters- Simplex and Duplex, Biological scrubbers, etc., bear a concrete testimony to our passion for innovative solutions.

“practical solutions that increase productivity while ensuring zero error operations”

Our Objectives

While protecting and regenerating the environment, we remain focused on enhancing productivity and bottom lines. Process innovation through research and partnerships are our key strengths. This enables us to be a one stop shop for all filtration and separation processes, designs and implementation. Our focus remains on upgradation of legacy systems, while constantly inventing non-conventional approaches to finding business solutions.

At Diva Envitec, our knowledge structure helps us to maintain an equilibrium between ensuring the best filtration solution for each problem, and lessening the environmental damage as far as possible. Here, every problem is approached with a dual layer method: through the products and through ingenious trouble shooting processes.

The product canopy covers the entire gamut of reverse osmosis, nano, ultra and micro-filtration process range, product knowledge, alternative technology, expertise and analysis equip our engineers not only to provide a solution, but to foresee a problem and design the right solution with instantaneous effect.

Working in tandem with world leaders and technology companies, our goal is to consistently look for newer methods and unconventional approaches. This extremely demanding and challenging task is achieved by canalizing our vast experience and practical know-how through ingenious inventions.

“regenerating the environment while focusing on enhanced productivity and bottom lines”

Focus Industries

Chemicals & Fine Chemicals

Activated Carbon Filtration
Precious Metal Catalyst Recovery
Raney Nickel Catalyst
Utilities
Desalting and Concentration
Inert gas blanketing in tanks
Liquid Gas Mixing
Wastewater Treatment Nano Milling /
Emulsion
Reaction Engineering

Sugar, Distillery & Bioethanol

Anaerobic Wastewater Digestion
Caustic Brine Recovery
Enzyme Processing & Recycle
Hemicellulose Recovery
Spent wash Treatment
Sugar Syrup Colour Removal
Syrup Filtration
Condensate Polishing
Utilities

“practical solutions that increase productivity while ensuring zero error operations”

API / Pharmaceutical and Chemicals

- Product Recovery
- Wastewater Treatment
- Reaction Engineering
- Colour Removal
- Precious Metal Catalyst Recovery
- Heavy Metal Recovery
- Activated Carbon Filtration
- Catalyst Cleaning
- Utilities
- Liquid Gas Mixing

Wastewater Treatment

- Zero Liquid Discharge - ZLD
- Toxic and Refractory COD
- Anaerobic Wastewater Digestion
- Product Recovery
- Aeration
- Colour Removal
- Oil Removal from water
- Produced Water Treatment (PWT)
- Utilities

Global Process filtration and separation solutions provider with an innovative approach

www.divaenvitec.com

Focus Industries

Focus industries

Petroleum & Petrochemical

Hot Gas Filtration
Wastewater Treatment
Liquid - Gas Mixing
Precious Metal Catalyst Recovery
Produced Water Treatment (PWT)
HDO-Gasoline
Utilities

Textile, Dye and Pigments

Desalting and Concentration
Dye-Recovery from baths
Wastewater Treatment
Zero-Liquid Discharge
Cake Washing
Utilities

maintaining equilibrium between optimum solutions to process industry problems, and their negative environmental impact.
