MYPOL

BUTYL AUTOMOTIVE TUBES
TECHNICAL RUBBER PRODUCTS

**Proud to be part of
Chandrayaan-3 Success**

Mypol manufactures quality rubber products.

Since 1981, Mypol has been a leading manufacturer of automotive inner tubes, technical rubber products and compounds for various industrial, defence and space requirements.

We offer solutions which make our customer's work easier & create opportunities. Mypol's diverse experience in development of products for demanding applications is our customer's advantage. Our development team is always eager to take on fresh challenges and work closely with our customer teams to ensure project success.

Mypol is over 800 members strong. This team is guided by a vision of exceeding customer expectations. The company places unwavering faith and high expectations from its workforce.

Expertise

Mypol prides itself in having developed rubber components in all polymers. Application ranging from Defence & Space, Heavy engineering, Precision equipment, Waste water treatment, Garment factories across many countries including USA, Germany, Australia, Sri Lanka, Pakistan, Afghanistan, Italy.

Over the last decade we have developed more than 200 different products.

Quality & certifications

3 decades of manufacturing has also taught us the power of systems to ensure quality products reach our customer.

Mypol is

ISO 9001:2015, ISO 14001:2015
IATF 16949:2016 certified.

A company with over 800 employees, over 50 customers and over 200 different products in production requires a robust system for smooth operations.

Our systems include 100% control of each batch of rubber compound, complete traceability with records being maintained as per customer set norms. SPC, FMEA and other tools and methods are part of the process to ensure control and problem solving. Systems evolve, we learn and adapt from industry best practices.

Automotive Inner Tubes

Mypol manufactures a complete range of *more than 100* sizes ranging from 2-wheeler to tractor and OTR sizes.

Mypol is a preferred OE supplier to most leading tyres companies in India, Pakistan & Sri Lanka.

Mypol branded tubes have a solid reputation in the replacement market. *Mypol* tubes are recognised by their superior performance & consistent quality. *Mypol* continues to increase its market share in India, Sri Lanka, Afghanistan & Bangladesh.

Retreading

 **MYPOL**
HEAVY DUTY MADE IN INDIA
7.50-16
MADE FROM IMPORTED BUTYL RUBBER
CURING BAG

Mypol is a leading manufacturer of re-treading products in India. Starting with Curing bags and envelopes we cater to large OE customers as well as the retail buyer.

Performance and quality are benchmarks in the Indian market with prestigious tyre companies recommending use of *Mypol* re-treading products at their franchises.

Design & mixing of rubber compounds lies at the heart of all rubber product development. We mix master batches & final compounds for a number of customers from Europe, Japan, USA and Canada. Mixing is a critical area for *Mypol* and we continue to upgrade technology to ensure we remain at the cutting edge of custom mixing activity. Focus is on consistency in quality, traceability, confidentiality.

Mypol mixes various polymers including Butyl, EPDM, FKM, Nitrile & Neoprene.

Mypol's latest venture is manufacture of rubber sheets. With quality machines from North America & Europe we now manufacture rubber sheets in a variety of polymers including NR, Neoprene, Nitrile, Butyl, FKM and EPDM.

The varied & specialised requirements of today's sheet markets have been kept in mind while designing the factory. Maximum flexibility has been factored in so as to cater to large & small volume production. Handling of black compounds has been completely eliminated from the factory to ensure accurate and consistent manufacture of coloured sheets.

Mypol can supply quality sheet products ranging from 0.3mm to 6.4mm thickness in a variety of widths and lengths with or without liners. We have made major inroads into the export markets with regular shipments to North America and Europe.

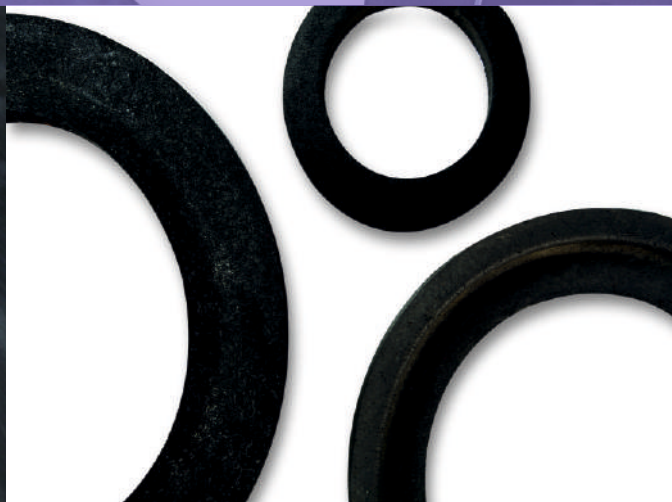

Waste water treatment facilities are perhaps some of the harshest service environments for rubber products. *Mypol* manufactures Disc and diffuser membranes in EPDM, Silicones and FKM.

This product developed more than 7 years ago has seen rapid development in manufacturing process and compound development. It is now the established benchmark in India & its' acceptance in facilities in Italy and China are a testament to quality and cost benchmarks.

Every new application & development comes with its own challenges. We choose projects that help create competitive advantages.

Mypol has vast experience in development of rubber products for critical applications, from concept stage to realisation.

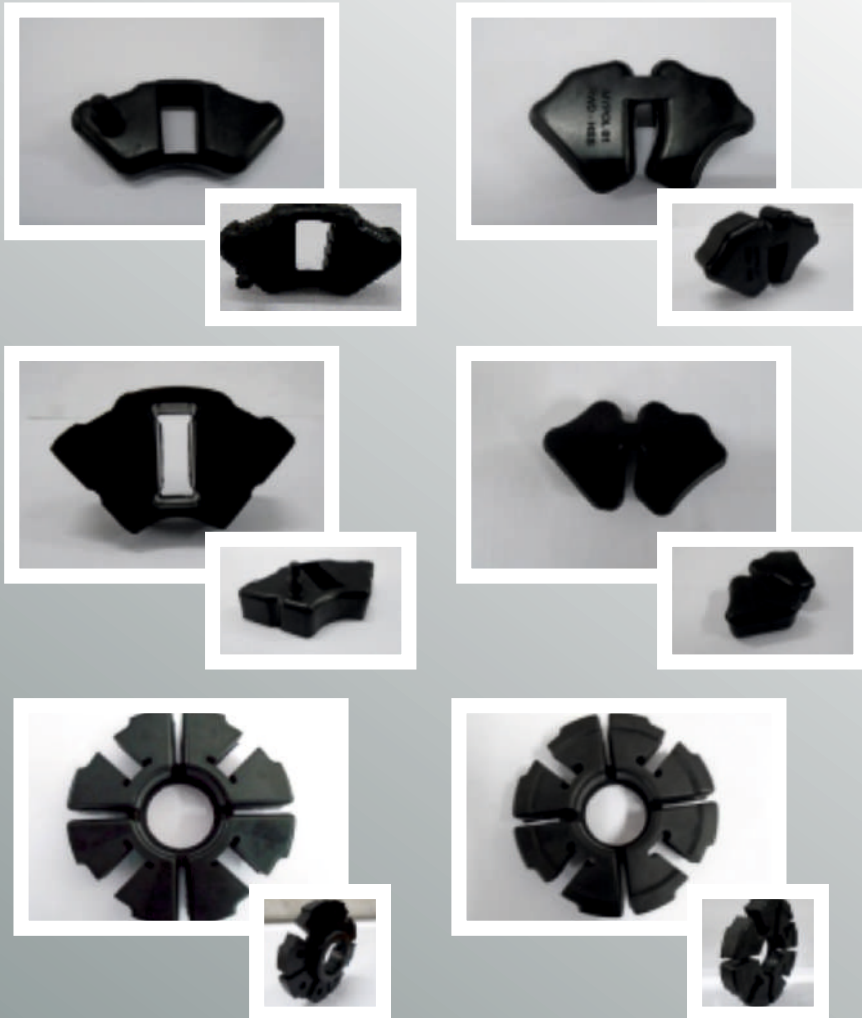

Mypol's has expertise in:
Injection moulding.
Compression moulding.
Transfer moulding.
Rubber-Metal bonded products.
Extruded products.
Sponge rubber parts.

Mypol's belief and support to research has brought in diverse industries, products and technologies. We work closely with the Indian space and Defence sectors. Close interaction and mutual transfer of technologies and know-how ensures seamless development of products for extremely critical applications.

Mypol's expertise in rubber technology has helped innovative product development and consistently met quality, delivery and high performance expectations.
